		\$ 18,499,012.00	\$ 18,499,012.00	\$ 36,998,024.00

PURPOSE OF EMPG GRANTS

The EMPG Program provides resources to assist state, local, tribal and territorial governments in preparing for all hazards, as authorized by Section 662 of the Post Katrina Emergency Management Reform Act (6 U.S.C § 762) and the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S.C. §§ 5121 et seq.). Title VI of the Stafford Act authorizes FEMA to make grants for the purpose of providing a system of emergency preparedness for the protection of life and property in the United States from hazards and to vest responsibility for emergency preparedness jointly in the federal government and the states and their political subdivisions. The FY 2014 EMPG will provide federal funds to assist state, local, tribal and territorial emergency management agencies to obtain the resources required to support the National Preparedness Goal's (NPG's) (the Goal's) associated mission areas and core

capabilities. The federal government, through the EMPG Program, provides necessary direction, coordination, and guidance, and provides necessary assistance, as authorized in this title to support a comprehensive all hazards emergency preparedness system.

The Emergency Management Performance Grant Program is to support a comprehensive, all-hazard emergency preparedness system by building and sustaining the core capabilities contained in the National Preparedness Goal.

Examples include:

- Completing the Threat and Hazard Identification and Risk Assessment (THIRA) process;
- Strengthening a state or community's emergency management governance structures;
- Updating and approving specific emergency plans;
- Designing and conducting exercises that enable whole community stakeholders to examine and validate core capabilities and the plans needed to deliver them to the targets identified through the THIRA;
- Targeting training and verifying identified capabilities;
- Initiating or achieving a whole community approach to security and emergency management.

PURPOSE OF CTP GRANTS

The Cooperating Technical Partners Program was developed to supplement and expand the on-going efforts of participating National Flood Insurance Program (NFIP) communities, Tribes, and States (and the agencies and organizations who support them) who perform certain functions in the flood risk analysis, flood hazard identification, flood risk communication and mitigation processes to reduce flood losses and protect life and property from the risk of future flood damage. The Cooperating Technical Partners Program seeks to: increase local involvement in, and ownership of, the development and maintenance of Flood Insurance Rate Maps (FIRMS) and risk related products produced for the NFIP; build and maintain partner capabilities; continue to increase local ownership of data and processes; and establish sound performance criteria for current Cooperating Technical Partners.

In FY 2009, FEMA transitioned from its Map Modernization (Map Mod) program to Risk MAP (Mapping, Assessment, and Planning). The vision for Risk MAP is to deliver quality data that increases public awareness of flood hazard risk and leads to action that reduces flood risk to life and property. Risk MAP builds on flood hazard data and maps produced during the Map Mod program. FEMA collaborates with a variety of stakeholders to achieve the following goals under Risk MAP:

1. Flood Hazard Data. Address gaps in flood hazard data to form a solid foundation for risk assessment, floodplain management, and actuarial soundness of the NFIP.
2. Public Awareness/Outreach. Ensure that a measurable increase of the public's awareness and understanding of risk results in a measurable reduction of current and future vulnerability.
3. Hazard Mitigation Planning. Lead and support States, local, and Tribal communities to effectively engage in risk-based mitigation planning resulting in sustainable actions that reduce or eliminate risks to life and property from natural hazards.
4. Enhanced Digital Platform. Provide an enhanced digital platform that improves management of Risk MAP, stewards information produced by Risk MAP, and improves communication and sharing of risk data and related products to all levels of government and the public.
5. Alignment and Synergies. Align Risk Analysis programs and develop synergies to enhance decision-making capabilities through effective risk communication and management.

Information about Risk MAP (including goals, strategies, progress and success stories), can be found on FEMA's website at
